

For Immediate Release:

October 12, 2009

NuTel Technologies is thrilled to announce the return of Doug Chapman!

Many of you know Doug well, and know what a fantastic technician he is. Doug has been factory certified on countless telecommunications systems including NEC and Mitel.

Doug moved from Northern Utah to work for NuTel several years ago. He came with excellent recommendations from previous employers, a great work ethic and technological astuteness that amazed even us! Doug left NuTel for a short time to work with **IT Services**—doing installation and maintenance—but has returned to Utah's Premiere Voice & Data Technology Center, NuTel Technologies.

NuTel has made large strides in the past several years, always honing our skills. We've built the single largest voice/data/video network in Southern Utah with more than 1500 cabled locations, networked together via fiber optic cable. We've built a number of VoIP networks to solve communications problems for customers, networking multiple offices together and setting up remote agents working from all over the country.

We're constantly improving our customer's businesses implementing VoIP technology where it fits their needs best.

Our goal is to provide our customers with the best solutions available to give YOU a competitive edge in YOUR marketplace. And many times, we can save you money while doing so!

Having great employees such as Doug is a big reason for NuTel's success. Please call NuTel today to schedule a service appointment or to discuss how we can help your business succeed!
